BIDDER QUESTIONS

1. **QUESTION:** 3.12 of 040120 Clay Masonry Restoration and Cleaning implies that the contractor is to hire a third party testing agent to inspect and prepare test reports for finished work. Can you confirm that this is to be performed by the contractor and is not an owner responsibility? Also, if this is a test to be paid for by the contractor, please advise as to what types of tests and inspections are to be performed.

   **ANSWER:** No testing is required for section 040120.

2. **QUESTION:** Is the existing topsoil that will be stockpiled on site and respread required to be screened? Also, please confirm depth of topsoil to be respread; 3.4 of 329113 calls for 8”, though this seems excessive for seed/sod areas.

   **ANSWER:** Yes, the existing topsoil should be screened per 32 91 13 3.2 to achieve the following: remove stones larger than 2 inches in any dimension and sticks, roots, rubbish, and other extraneous matter and legally dispose of them off Owner's property. For depth of topsoil coordinate Planting Details with Specifications. For seed/sod areas the depth of planting mix should be 4”. Refer to detail 9/L404.

3. **QUESTION:** Linoleum sheet flooring is specified but not shown on the Finish Schedule. Please confirm it is not applicable to this project.

   **ANSWER:** Linoleum sheet flooring is not required.

4. **QUESTION:** Please provide the height of the temporary office partitions and confirm acoustical ceiling tile height per 9E and 9H on A1.00. Are the partitions to terminated at the ceiling, where is the ceiling tile to be hung from? ACT is shown at 10’0”, though we are unclear on how high the partitions go.

   **ANSWER:** All walls shown in detail 9E and 9H are dictated by the final design and are to be installed to the underside of roof deck per A0.11. The walls in 9E and 9H/A1.00 are not temporary with the exception of the wall noted as ‘Temp. Partition’ in the NW corner of ‘Temporary Conference Room’.

5. **QUESTION:** Of the trees to be removed by the arborist, per the LJ drawings, currently there is no stipulation about the contractor having to remove the stump, as there is for the normal tree removals (See LJ-103 for example). Please clarify if the general contractor will be responsible for removing the stumps for trees the arborist takes down as well.

   **ANSWER:** Trees marked for “removal by arborist” are intended to have stumps cut flush to grade and left intact and not removed. If the owner desires one of these stumps removed it needs to be ground out by an arborist and not excavated. Refer to item #2 under Tree Preservation Specifications on sheet LJ-001.

6. **QUESTION:** Please clarify what the items are on the north wall of Music 142, per A2.41, and if the general contractor will be responsible for providing them.

   **ANSWER:** The items on the north wall of 142 are scheduled on sheet ID2.01. The specialty equipment schedule provides description and responsibility.

7. **QUESTION:** Please provide detail for plastic laminate column cover with subframing, location shown at 9G/A8.00.

   **ANSWER:** See column cover detail provided with ASK-006.

8. **QUESTION:** Please provide section details for tiered bench seating shown at Stair D per A8.00.

   **ANSWER:** Refer to 9D/A5.14 for section details at tiered bench seating.
9. QUESTION: Please clarify height of acoustical screen walls; A4 series elevations appear to be in conflict with 3A/A2.55 detail in regards to height.
   ANSWER: All acoustical screen walls are to be 6' high per A2.55.

10. QUESTION: Please provide unassigned AR5.11 detail where called out on section 9A/A5.14.
    ANSWER: Reference detail 3/AR5.17.

11. QUESTION: 2/AR5.12 shows a completely different roof to wall assembly than what is depicted on 6K/A5.23 in regards to relief angle orientation, brick veneer extent, wood stud framing, etc.; please advise as to which one should be adhered to.
    ANSWER: These details are similar. Refer to 2/AR5.12 for the specific sheet metal and roofing details outside of the face of brick. Refer to 6K/A5.23 for the wall assembly and thru-wall flashing.

12. QUESTION: Please advise as to where 083613 Sectional Doors specification applies to this project. We believed it to possibly be opening 144C, but the A9.00 door schedule calls this door out as an Overhead Coiling Door.
    ANSWER: See changes to door schedule listed above.

13. QUESTION: Please reference 6A/A7.02 and 7C/A7.10 for classroom panel surround at entry doors. Corridor elevations show two total doors, however the A7.02 elevation notes it as typical. Please clarify if more than the two openings shown at the corridor elevation 6A/A7.02 require this surround panel, and if they do please provide locations.
    ANSWER: Yes, more than 2 doors are required to receive the classroom panel surround. The classroom panel surround is tagged as CP on ID sheets.

14. QUESTION: AWP-2 wall panel type is called out on various rooms, yet is not listed on the ID0.01 Finish Material Legend. Please advise.
    ANSWER: Revise all AWP-2 wall panel type in Finish Schedule to AWP-1.

15. QUESTION: Please provide location/size/elevation of existing mural in Cafeteria so that we may completely price the restoration of it in accordance with 097200.
    ANSWER: See changes to specification 097200 listed above.
